International Business

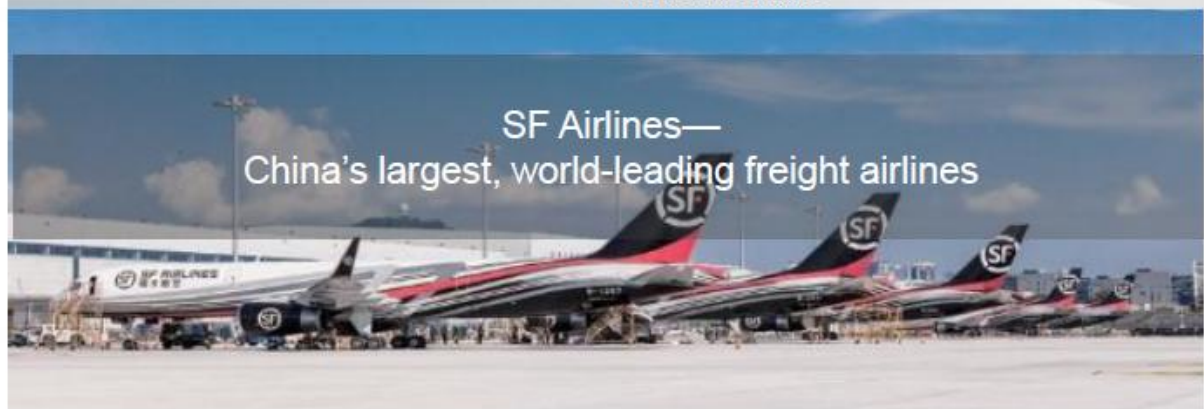

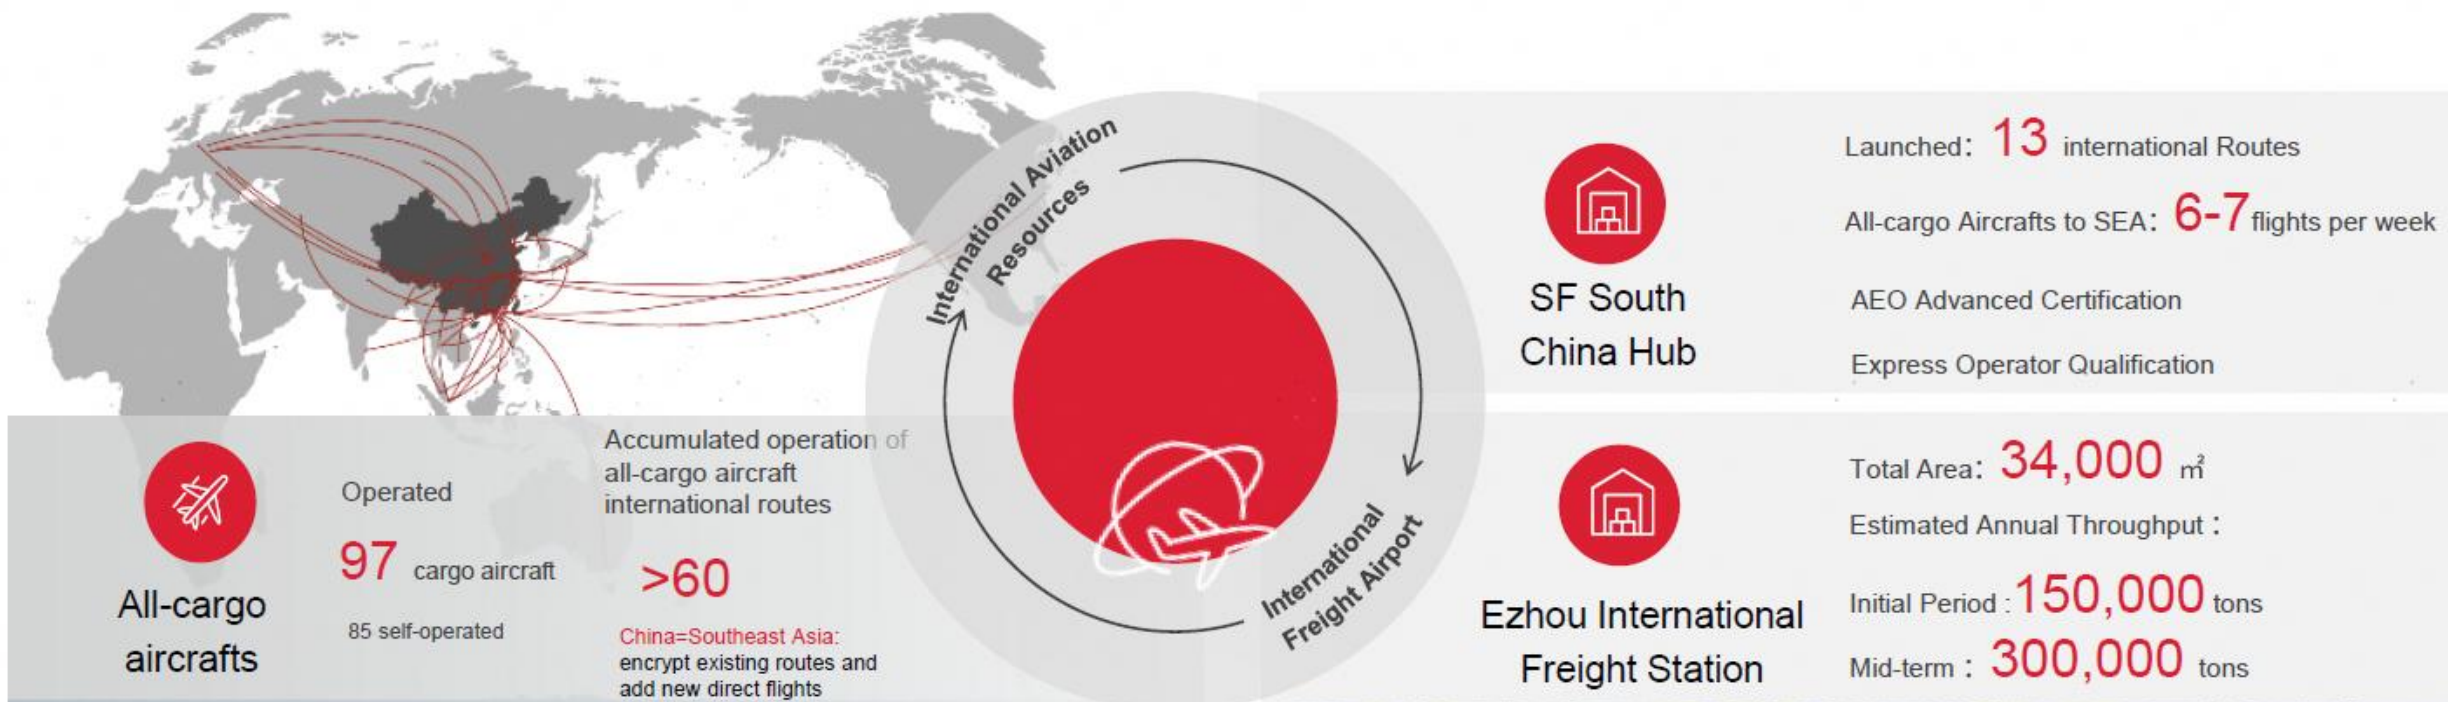

SF International provides convenient and reliable logistics services such as international express delivery and cross-border e-commerce for manufacturing enterprises, trade companies, e-commerce and consumers at home and abroad. SF International provides customized and integrated import and export supply chain solutions for transportation, customs clearance, delivery, overseas warehouses and system.

In 2021, SF successfully joined hands with Kerry Logistics. Both parties complement each other's advantages, continuously strengthen the building of international core operation capacities, establish international aviation network, improve international service capacities, optimize global express delivery network layout and further expand the company's international business layout.

International Aviation Network

Relying on SF Airlines' own all-cargo aircraft resources, international routes to Asia, North America and Europe are launched to provide stable and reliable space guarantee.
