#### **Fixes**

- Fixed the issue of PosTransfer crashing in landscape mode [PB\_20230324\_0003]

**V1.00.000 (15 February 2023)**

First release.

This is the first version of the PosTransfer mobile application. Postal operators who are members of the Postal Payment Services Group (PPSUG) can benefit from this release by enabling their customers to prepare for the international transfer of cash from the comfort of their own homes.

This initial version has the following features:

Through the **Pre-fill** function:

- Publication of a postal organization's services for international money transfers
- Accurate assessment of the postal operator's charges and services (including potential destinations, fees, and exchange rates)
- Generation of a short code to automatically retrieve the data and pre-filling of the required PosTransfer fields in order to send cash to a recipient and save time at the counter

Through the **My PosTransfers** function:

- Ability to retrieve pre-filled information and allocated code for each PosTransfer created by the user
- Ability to transmit again the information if an internet connection was not available at the time of pre-filling

Through the **More** function:

- View legal information (privacy, terms & conditions), application details, and support contacts

Support for two languages (English and French)

Integration with postal payment services APIs (ReferenceAPI, BAMS, UPU-IP EAP API)
