Version 1.00.003

Build 1.00.003 (16 September 2026)

This release includes the following enhancement:

- The IFS Mobile app now supports Android 16 (API level 36).

Version 1.00.002

Build 1.00.002 (15 July 2025)

This release includes the following fixes:

Fixes

- The IFS Mobile app now correctly retrieves and converts the identifier of the certificate involved in operations with the **Mobileservices** API, allowing to report operations per certificate correctly [IN_20250707_0011].
- The IFS Mobile app now successfully updates the local **soap_settings.xml** file and its referred contents when the published file is modified.

Version 1.00.001

Build 1.00.001 (28 February 2025)

This release includes the following enhancements and fixes:

Enhancements

- The app now supports Android 14 and 15 (API level 34 and 35) [PB_20230324_0002]
- The app now requires Android 6 (API level 23) as the minimum API level
- The app now uses Firebase to improve its support features

Fixes

- The layout issues for login, payment, and password change screens have been fixed [PB_20250206_0002, PB_20240930_0001]
- IFS Mobile app is now able to handle payment of orders without Customer Transaction Numbers (CTN), originating from UPU-IP partners [PB_20241107_0001]
- The French translation for change password has been corrected

Version 1.00.000
